

GLOBAL
ENVIRONMENTAL
ENGINEERING INC.

Client: Spinniken Orchards

Project Budget: \$7,850.00
Contract Start Date: Apr, 2003
Completion Date: Jul, 2003

Spinniken Orchards Suttons Bay Township

Global performed a Soil and groundwater Investigation in an area of a former, unregulated dump used for agricultural purposes on property leased by our client. The purpose of the investigation was to serve as due diligence for a real estate transaction. Aerial photographs were used to determine the location of the former dump and select boring locations. Additional research included a regulatory records search to determine if there was the potential for off-site migration of contamination onto the subject property, and to verify if the subject property was listed as a solid waste facility. Additional sampling on adjacent property for pesticides and herbicides was also conducted by Global.
